

# Nurse Nidhi manages a late-night emergency delivery

## Ensures a happy birthing experience

**Mahi, New Mother**  
**Atulya Hospital, Jaipur,**  
**Rajasthan**

When Mahi, a first-time mother, a week over her due date started experiencing excessive white discharge, she rushed to the closest hospital

Nurse Nidhi admitted and monitored her and the fetus's vitals closely while she familiarized herself with the case

When the issue persisted, and the fetus's vitals began to drop, she induced labor to avoid any potential complication

Mahi was delighted to welcome her son and grateful to nurse Nidhi and Atulya Hospital for making her childbirth experience smooth and seamless

Successfully managing the delivery of a healthy baby boy without the presence of a doctor, Nidhi put her Manyata training into action to save the mother and child

**Manyata ensures quality care trickles down to the smallest of cities - making India a safer country for childbirth**

**MANYATA'S THIRD STANDARD TEACHES PROVIDER TO ASSESS ALL PREGNANT WOMEN AT ADMISSION. THIS INCLUDES TAKING THEIR OBSTETRIC, MEDICAL AND SURGICAL HISTORY, RECORDING FETAL HEART RATE AND THE MOTHER'S BP AND TEMPERATURE.**
